

Cyber crime is any criminal act related to computers and networks which is called hacking, phishing, spamming or is used as a tool to commit an offence (child pornography and hate crimes) conducted through the Internet. It is a bigger risk now than ever before due to the sheer number of connected people and devices. Cyber crime is a term for any illegal activity that uses a computer as its primary means of commission. Cyber criminals may use computer technology to access personal information, business trade secrets, or use the Internet for exploitive or malicious purposes. Criminals can also use computers for communication and document or data storage.

Nowadays, it has become the need of an hour to educate students of all ages about the problems associated with the usage of online platforms. So that children make themselves aware of fraud which can be in the form of financial fraud etc.
