## Feedback analysis of stakeholders and action report for the year 2023-24

The institution collected feedback on curriculum, administration, infrastructure, student support service and courses from different stakeholders like students, alumni and faculty. The IQAC through College Advisory Committee analysed the feedback and valuable suggestions given were considered and necessary action was executed.

S. No	Feedback	Action taken
1.	On Syllabus completion	The feedback (taken in online mode) was shared with college faculty and it was ensured that the syllabus is completed well on time in every course. The College Academic Affairs Committee visits all Departments from time to time and takes on-spot review of the status of syllabus completion and appraised the concerned faculty regarding lesson plans of every day so that syllabus will be completed on time.
2.	On Teachers	The feedback was shared with the college faculty so that they get informed about the student feedback on teachers. The college IQAC through academic affair committee convened a general meeting with all the faculty members wherein a thorough discussion was made on the received feedback. It was made sure that the teachers must be well-prepared for the class that can create a conducive learning environment which makes class more productive and enjoyable for every student. It was also discussed that different ways of ICT learning methods like e-content preparation through Digital recording studio, Learning Management System or learning through Interactive Flat Panel Display system can make the teacher-student interaction more vibrant.
3.	Internal Assessment	The feedback received was shared with the faculty so that they get appraised about the student analysis on the internal Assessment of our college. The college IQAC in collaboration with Examination Cell takes every effort to make internal evaluation very fair by providing the answer

		scripts in coded form and adequate remuneration to the concerned evaluator.
4.	Student support System	The feedback received on 'student support system' was shared with the faculty so that they get appraised about the student analysis on the said criteria. Although the feedback received from 85% of the stakeholders is satisfactory but 15% of the respondents are contrary to it. The IQAC convened a general meeting with College Development Committee wherein thorough discussion was made on the 'student support system' like playing field, canteen, health facility, Washrooms, etc. It was impressed that much more ground work is required to be done to make this institution more healthy and more student centric. The college administration is continuously working hard to get approvals from higher authorities for providing more student-centric facilities like building of new sophisticated washrooms, spacious girl's hostel, New classroom block, indoor stadium, basketball court, gymnasium hall, health centre, etc. These amenities present in the college contribute to a comfortable and conducive learning environment for students.
5.	ICT infrastructure	The feedback regarding ICT facilities inside the college was shared with faculty in general and Development Committee in particular. Although 90% of the students are of the opinion that there are ICT facilities available in our college but more ground work is needed to be done. The committee ensured that more steps are needed to be taken for making our college more ICT enabled like more IFPDs for making more smart class rooms, more vibrant digital recording studio for group discussions, and many high processed computers to be purchased for ensuring better IT facilities. The committee under the patronage of worthy Principal impressed upon purchasing of more high tech computers on fast track basis for the Computer Science Department so that students learn to operate more advanced computers and related softwares. Further more thorough discussion was made on the browsing centre and it was said that restoration and more rectification is required to make browsing centre

		student-centric and more vibrant. A better browsing centre will definitely facilitate, foster and support teaching learning process in our college.
6.	Grevience & redressal Mechanism	Any grevience received is promptly taken up by the Grevience & redressal cell of our college which works very close with the administration. Moreover, our institution has already well established Anti-sexual Harassment cell/Women empowerment Cell to ensure the safety, freedom and rights of female students in the campus. Moreover, to give a safe space to the female candidates, a Girls Common room has also been put in place. Furthermore, CCTV cameras have been put in place in whole campus so that campus is under surveillance which will help in ensuring full women safety in campus. Although the Grevience & redressal cell for student is strongly working inside the college but there is a dire need of 'Employees Grevience Redressal Committee' so that any issue of any college employee will be resolved quickly and substantially.
7.	Extra-Curricular Activities	Observation of National Youth/Women Day, international Yoga day, SWAACH Bharat and many more activities were carried out which address the current needs of our society. Lectures on research at undergraduate level and skill India were organized under the banner of New Education policy. Different workshops and seminars were conducted on many issues like gender equality, legal services to senior citizens, etc. Although the feedback received in this regard is praiseworthy but NSS/NCC needs to be further activated to support more extra-curricular activities like cleanliness drives on weekly basis in collaboration with Municipal Committee, reaching out to wider community services, etc
