WOMEN IN LEADERSHIP: ACHIEVING AN EQUAL FUTURE IN A COVID-19 WORLD

This year, the theme for International Women's Day, celebrates the tremendous efforts by women and girls around the world in shaping a more equal future and recovery from the COVID-19 pandemic and highlights the gaps that remain.

Women's full and effective participation and leadership in all areas of life drives progress for everyone. Yet, women are still under-represented in public life and decision-making, as revealed in the UN Secretary-General's recent report. Women are Heads of State or Government in 22 countries, and only 24.9 per cent of national parliamentarians are women. At the current rate of progress, gender equality among Heads of Government will take another 130 years. Women are also at the forefront of the battle against COVID-19, as front-line and health sector workers, as scientists, doctors and caregivers, yet they get paid 11 per cent less globally than their male counterparts. An analysis of COVID-19 task teams from 87 countries found only 3.5 per cent of them had gender parity. This is why, this year's International Women's Day is a rallying cry for Generation Equality, to act for an equal future for all.
