Subject: -   Report regarding implementation of Feedback System launched by the Department of Higher Education (Govt of Jammu and Kashmir)

As per the communication received from the administrative department, the department of Computer Applications of GDC Kulgam established a facilitation centre for successful implementation of DHE feedback System. The process started initially with the registration of different programmes, subjects and departments of the college on the feedback portal. Then the service particulars of all the teaching faculty and the particulars of more than 4000 students of the college were uploaded and hence their accounts were created for submitting the feedback. After that subjects were assigned to all the teachers as per departmental time tables submitted by the heads of different departments of the college.

The Department of Computer Applications organised a training session in the conference hall of the college on 26/08/2022 in which most of the faculty members of the college attended. The Nodal Officer DHE Feedback System, Prof Sajad Ahmad Shah explained to the participants how to use their credentials and how to upload the student data and submit feedback about the college. All the issues faced by the teachers were resolved on spot and their queries were also answered by the nodal officer.

Keeping in view the enormous enrolment of students in the college, the teachers of the college faced many difficulties even after training but the facilitation centre established in the Department of Computer Applications always remained open for helping the teachers in successful implementation of the said system.

Prof Sajad Ahmad Shah
